1128

MATHEMATICS

Paper-III : Trigonometry and Matrices

Time Allowed : Three Hours] **[Maximum Marks : 30**

Note :— Attempt **five** questions in all by selecting at least **two** questions from each unit.

UNIT—I

1. (a) If $a = \text{cis}\,\alpha$, $b = \text{cis}\,\beta$, $c = \text{cis}\,y$ and $a + b + c = 0$. Then prove that :

$$\frac{1}{a}+\frac{1}{b}+\frac{1}{c}=0.$$

(b) If α and β are the roots of $x^2 - 2x + 4 = 0$, prove that :

$$\alpha^n+\beta^n=2^{n+1}\cos\frac{n\pi}{3}.$$ 3,3

2. (a) Solve $x^7 = 1$ and prove that the sum of the n^{th} powers of the roots is 7 or zero according as n is or not multiple of 7.

(b) Prove that :

$$\cos^7\theta=\frac{1}{2^6}[\cos 7\theta + 7\cos 5\theta + 21\cos 3\theta + 35\cos\theta].$$

3,3

3. (a) If $\sin(\theta + i\phi) = \tan\alpha + i \sec\alpha$, show that :

$$\cos 2\theta \cosh 2\phi = 3.$$

(b) If $\cos(\theta + i\phi) = r(\text{Cos}\ \alpha + i \sin\alpha)$, then prove that :

$$\phi = \frac{1}{2}\log\frac{\sin(\theta-\alpha)}{\sin(\theta+\alpha)}. \qquad 3,3$$

4. (a) For $\alpha, \beta \in C$, $\beta \neq 2n\pi$, $n \in z$, show that :

$$\cos\alpha + \cos(\alpha+\beta) + \cos(\alpha+\alpha\beta) + \ldots\ldots\ldots + \cos(2\alpha(n-1)\beta)$$

$$= \frac{\cos\left(\alpha + \frac{n-1}{2}\beta\right)\sin\frac{n\beta}{2}}{\sin\frac{\beta}{2}}.$$

(b) Prove that :

$$1 + \frac{1}{3} - \frac{1}{5} - \frac{1}{7} + \ldots\ldots\ldots = \frac{\pi}{2\sqrt{2}}. \qquad 3,3$$

UNIT—II

5. (a) Show that every Hermitian Matrix A can be uniquely expressed as P + iQ, where P and Q are real symmetric and real skew symmetric matrices respectively. Also show that $A^{\theta}A$ is real iff PQ = – QP.

(b) Check for the linear dependence of the following system of vectors : u = (1, –1, 1), v = (2, 1, 1), w = (3, 0, 2). If dependent, find the relation between them. 3,3

6. (a) Find the rank of the matrix $\begin{bmatrix} 9 & 0 & 2 & 3 \\ 0 & 1 & 5 & 6 \\ 4 & 5 & 3 & 0 \end{bmatrix}$ by

reducing it to normal form.

(b) Express the following matrix as the sum of a Hermitian and Skew Hermitian matrix :

$$\begin{bmatrix} 2-i & 3 & 1+i \\ -5 & 0 & -6i \\ 7 & i & -3+2i \end{bmatrix}.$$ 3,3

7. (a) Find the value of k so that the equations :

$x - 2y + z = 0$

$3x - y + 2z = 0$

$y + kz = 0$ have

(i) a unique solution, (ii) infinitely many solutions. Also find solutions for these values of k.

(b) Find values of λ and μ for which the system of equations :

$x + y + z = 6$

$x + 2y + 3z = 10$

$x + 2y + \lambda z = \mu$ has

(i) no solution, (ii) a unique solution, (iii) an infinite number of solutions. 3,3

8. (a) State and prove Cayley-Hamilton theorem.

(b) Check whether the matrix $A = \begin{bmatrix} 1 & 2 & 3 \\ 0 & 4 & 6 \\ 0 & 4 & 9 \end{bmatrix}$ is diagonalizable or not. 3,3

B.Sc. / B.A./B.Com/B.tech Maths

Personalised Offline/Online Classes available.

Facing Problems in Graduation Math
We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Doubt Solving:

Our Doubt Clearance Sessions, emphasizing Misconceptions and repeated errors. Along with that, we help you create study plan that will ensure your success in exam.

Foundation for IIT JAM & CSIR NET and Competitive Maths

Mathematics in Graduation is first step towards the higher and competitive Maths. We focus on conceptual understanding which work as a base for the competitive maths.

Clear B.Sc., B.Com, BCA, B.Tech College Maths with good grades

Getting good marks along with conceptual understanding will boost your confidence. Feel free to ask for Demo sessions. You have liberty to join the classes for specific topic rather than whole book.

Dr. Himanshu Singla (Ph.D Maths)

7 Years Teaching Experience at prestigious institutes like NMIMS (Chd), DAVC Sector 10, PGGC 11 Chd., UIET Sector 25

We make Maths easy for you at Abhyaskul. We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Follow our You Tube Channel. (Search Abhyaskul at You Tube)

Learn the basics of math at our YouTube channel!
Our channel covers a wide range of math topics, from basic arithmetic to algebra and geometry. You can always ask to make a video on any topic. We wil try to provide it as soon as possible.
Whether you're struggling with a particular concept or just want to brush up on your math skills, our YouTube channel is a great resource. Visit our channel today and start learning!

Career Opportunities in Maths

After graduating in maths, a world of opportunities opens up. You can pursue careers in finance, data science, engineering, research, or academia. Maths graduates are in demand for their analytical and problem-solving skills, and they can play a key role in driving innovation and solving complex challenges in a variety of industries. For any query regarding career opportunity in Math, feel free to meet.
