(ii) Questions : 8 Sub. Code : 0045

Exam. Code : 0001

B.A./B.Sc. (General) 1st Semester

(1129)

MATHEMATICS

Paper—III

(Trigonometry and Matrices)

Time Allowed : Three Hours] **[Maximum Marks : 30**

Note :— (1) Attempt ***five*** questions in all by selecting at least ***two*** questions from each unit.

(2) All questions carry equal marks.

UNIT—I

1. (a) If $a = \cos\left(\frac{2\pi}{7}\right) + i \sin\left(\frac{2\pi}{7}\right)$, $b = a + a^2 + a^4$ and $c = a^3 + a^5 + a^6$, then show that b and c are roots of equation $x^2 + x + 2 = 0$. 3

(b) Find all value of $\left(\frac{1}{2} + i\frac{\sqrt{3}}{2}\right)^{3/4}$ and show that continued product of all the value is 1. 3

2. (a) State and prove De-Moivre's theorem for integral index. 3

(b) Show that each primitive 12^{th} root of unity statisfies $x^4 - x^2 + 1 = 0$. 3

3. (a) If $i^{i^{i^{\cdots\cdots\infty}}} = A + iB$ and only principal value are considered, prove that :

(i) $\tan\left(\frac{\pi A}{2}\right) = \frac{B}{A}$

(ii) $A^2 + B^2 = e^{-\pi B}$. 3

(b) Prove that $\log\left(\frac{\sin(x+iy)}{\sin(x-iy)}\right) = 2i \tan^{-1}(\cot x \tanh y)$. 3

4. (a) Sum to n terms the series $\sin\theta + \frac{1}{3}\sin 2\theta + \frac{1}{3^2}\sin 3\theta + \ldots\ldots$ 3

(b) Prove that $\lim_{x\to 0} \frac{1}{x^2} \log\left(\frac{\tan^{-1} x}{x}\right) = \frac{-1}{3}$. 3

UNIT—II

5. (a) Prove that every square matrix over C can be expressed uniquely as P + iQ, where P and Q are Hermitian matrices. 3

(b) Let $A = \begin{bmatrix} 1 & 1 & 1 \\ 1 & -1 & -1 \\ 3 & 1 & 1 \end{bmatrix}$. Find non-singular matrices P and Q such that PAQ is in normal form and hence determine rank of A. 3

6. (a) Solve completely the system of equation :

$x + 2y + 2z - s + 3t = 0$

$x + 2y + 3z + s + t = 0$

$3x + 6y + 8z + s + 5t = 0$ 3

(b) Show that rank of $\begin{bmatrix} a & b & c \\ b & c & a \\ c & a & b \end{bmatrix}$ is less than 3 iff either

$a + b + c = 0$ or $a = b = c$. 3

7. (a) Investigate for what value of γ, μ the simultaneous equations :

$x + y + z = 6$

$x + 2y + 3z = 10$

$x + 2y + \gamma z = \mu$ have

(i) Unique solution

(ii) No solution

(iii) Infinite number of solutions. 3

(b) Prove that characteristic roots of Hermitian matrix are real. 3

8. (a) If $A = \begin{bmatrix} 1 & 2 \\ -1 & 3 \end{bmatrix}$ then using Caley-Hamilton theorem express $A^6 - 4A^5 + 8A^4 - 12A^3 + 14A^2$ as linear polynomial in A. 3

(b) Diagonalize the following matrices, if possible :

$A = \begin{bmatrix} 2 & 1 \\ 4 & 2 \end{bmatrix}$ 3

B.Sc. / B.A./B.Com/B.tech Maths

Personalised Offline/Online Classes available.

Facing Problems in Graduation Math
We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Doubt Solving:

Our Doubt Clearance Sessions, emphasizing Misconceptions and repeated errors. Along with that, we help you create study plan that will ensure your success in exam.

Foundation for IIT JAM & CSIR NET and Competitive Maths

Mathematics in Graduation is first step towards the higher and competitive Maths. We focus on conceptual understanding which work as a base for the competitive maths.

Clear B.Sc., B.Com, BCA, B.Tech College Maths with good grades

Getting good marks along with conceptual understanding will boost your confidence. Feel free to ask for Demo sessions. You have liberty to join the classes for specific topic rather than whole book.

Dr. Himanshu Singla (Ph.D Maths)

7 Years Teaching Experience at prestigious institutes like NMIMS (Chd), DAVC Sector 10, PGGC 11 Chd., UIET Sector 25

Follow our You Tube Channel. (Search Abhyaskul at You Tube)

Learn the basics of math at our YouTube channel!
Our channel covers a wide range of math topics, from basic arithmetic to algebra and geometry. You can always ask to make a video on any topic. We wil try to provide it as soon as possible.
Whether you're struggling with a particular concept or just want to brush up on your math skills, our YouTube channel is a great resource. Visit our channel today and start learning!

Career Opportunities in Maths

After graduating in maths, a world of opportunities opens up. You can pursue careers in finance, data science, engineering, research, or academia. Maths graduates are in demand for their analytical and problem-solving skills, and they can play a key role in driving innovation and solving complex challenges in a variety of industries. For any query regarding career opportunity in Math, feel free to meet.
