MATHEMATICS

(Advanced Calculus-I)

Paper : I

Time : 3 Hours] **[Max. Marks : 30**

Note :– Attempt *five* questions in all, selecting at least *two* questions from each Section. All questions carry equal marks.

Section–I

1. (a) Show that the function :

$$f(x, y) = \frac{x^2y^2}{x^2y^2 + (x-y)^2},$$

the two repeated limits at (0, 0) exist and are equal, but the simultaneous limit does not exist.

(b) Show that the function $f(x, y) = |x| + |y|$ is continuous at the origin.

2. (a) If $u = \dfrac{1}{\sqrt{1-2xy+y^2}}$, show that :

$$\frac{\partial}{\partial x}\left[(1-x^2)\frac{\partial u}{\partial x}\right]+\frac{\partial}{\partial y}\left(y^2\frac{\partial u}{\partial y}\right)=0$$

(b) If Z is function of x and y prove that if $x = e^u + e^{-v}$, $y = e^{-u} - e^v$, then $\dfrac{\partial z}{\partial u}-\dfrac{\partial z}{\partial v}$

$$=x\frac{\partial z}{\partial x}-y\frac{\partial z}{\partial y}.$$

3. (a) Show that $f(x, y) = \cos x + \cos y$ is differentiable at every point of R^2.

(b) For the function $\phi x^2y^3z^4$, find the directional derivative of ϕ at (2, 3, 1) in the direction making equal angles with x, y and z-axis.

4. (a) If $\vec{f} = x^2yz\,\hat{i} - 2xz^3\,\hat{j} + xz^2\,\hat{k}$ and $\vec{g} = 2z\,\hat{i} + y\,\hat{j} - x^2\,\hat{k}$, then find the value

$$\frac{\partial^2}{\partial x\partial y}(\vec{f}\times\vec{g})$$ at point (2, 0, –3).

(b) Find constants a, b, c so that $\vec{F} = (x + 2y + az)\hat{i} + (bx - 3y - z)\hat{j} + (4x + cy + 2z)\hat{k}$ is irrotational.

Section–II

5. (a) If $H = f(x, y, z)$ is a homogeneous function of x, y and z of degree n then $x\frac{\partial H}{\partial x} + y\frac{\partial H}{\partial y} + z\frac{\partial H}{\partial z} = nH$.

(b) State Taylor's theorem for the function of two variables and use this to expand for $f(x, y) = e^{xy}$ at (1, 1) upto third term.

6. (a) If $u^3 + v + w = x + y^2 + z^2$,

$u + v^3 + w = x^2 + y + z^2$,

$u + v + w^3 = x^2 + y^2 + z$,

prove that :

$$\frac{\partial(u,v,w)}{\partial(x,y,z)} = \frac{1 - 4(xy + yz + zx) + 16xyz}{2 - 3(u^2 + v^2 + w^2) + 27u^2v^2w^2}$$

(b) Show that $u = x + y + z$,

$$v = yz + zx + xy,$$

$$w = x^3 + y^3 + z^3 - 3xyz$$

are not independent of one another also find the relation between them.

7. (a) Find the envelope of the family of lines :

$$\frac{ax}{\cos\theta} - \frac{by}{\sin\theta} = a^2 - b^2,$$

θ being the parameter.

(b) Find the centre of curvature of the rectangular hyperbola $xy = a^2$ and deduce the equation of its evolute.

8. (a) Find the maximum and minimum values of the function :

$f(x, y) = \sin x + \sin y + \sin (x + y)$

(b) Let $f : R^3 \to R$ be defined by $f(x, y, z) = xyz$. Determine x, y, z for maximum of f subject to condition $xy + 2yz + 2zx = 108$.

B.Sc. / B.A./B.Com/B.tech Maths

Personalised Offline/Online Classes available.

Facing Problems in Graduation Math
We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Doubt Solving:

Our Doubt Clearance Sessions, emphasizing Misconceptions and repeated errors. Along with that, we help you create study plan that will ensure your success in exam.

Foundation for IIT JAM & CSIR NET and Competitive Maths

Mathematics in Graduation is first step towards the higher and competitive Maths. We focus on conceptual understanding which work as a base for the competitive maths.

Clear B.Sc., B.Com, BCA, B.Tech College Maths with good grades

Getting good marks along with conceptual understanding will boost your confidence. Feel free to ask for Demo sessions. You have liberty to join the classes for specific topic rather than whole book.

Dr. Himanshu Singla (Ph.D Maths)

7 Years Teaching Experience at prestigious institutes like NMIMS (Chd), DAVC Sector 10, PGGC 11 Chd., UIET Sector 25

Follow our You Tube Channel. (Search Abhyaskul at You Tube)

Learn the basics of math at our YouTube channel!
Our channel covers a wide range of math topics, from basic arithmetic to algebra and geometry. You can always ask to make a video on any topic. We wil try to provide it as soon as possible.
Whether you're struggling with a particular concept or just want to brush up on your math skills, our YouTube channel is a great resource. Visit our channel today and start learning!

Career Opportunities in Maths

After graduating in maths, a world of opportunities opens up. You can pursue careers in finance, data science, engineering, research, or academia. Maths graduates are in demand for their analytical and problem-solving skills, and they can play a key role in driving innovation and solving complex challenges in a variety of industries. For any query regarding career opportunity in Math, feel free to meet.
