**B.A./B.Sc. (General) 3rd Semester
(2122)**

MATHEMATICS

Paper : I (Advanced Calculus-I)

Time Allowed : Three Hours]

[Maximum Marks : 30

Note :—Attempt FIVE questions in all, selecting at least TWO questions from each unit. All questions carry equal marks.

UNIT—I

1. (a) Let $f(x,y) = \begin{cases} \frac{x^2y}{x^4+y^2}, & x^2+y^2 \neq 0 \\ 0, & x=y=0. \end{cases}$

Prove that a straight line approach gives the limit zero, but the limit does not exist at $(0, 0)$.

(b) Let $D = \{(x, y) : 0 < x < 1, 0 \leq y < 1\}$ and $f : D \rightarrow \mathbb{R}$ be defined by

$$f(x, y) = \begin{cases} 1 & \text{if } y \neq 0 \\ 0 & \text{if } y = 0. \end{cases}$$

Show that f is not continuous at any point $(a, 0)$, where $0 < a < 1$.

2. (a) If $\theta = t^n e^{-\frac{r^2}{4t}}$, find the value of n which will make

$$\frac{1}{r^2} \frac{\partial}{\partial r} \left(r^2 \frac{\partial \theta}{\partial r} \right) = \frac{\partial \theta}{\partial t}.$$

- (b) If $x^y + y^x = (x + y)^{x+y}$, then by using partial derivatives, find $\frac{dy}{dx}$.

3. (a) State Young's theorem. Show that $f_{xy}(0, 0) \neq f_{yx}(0, 0)$ for the function $f(x, y) = xy \left(\frac{x^2 - y^2}{x^2 + y^2} \right)$, where $(x, y) \neq (0, 0)$ and $f(0, 0) = 0$.

- (b) Show $f(x, y) = \cos x + \cos y$ is differentiable at every point of \mathbf{R}^2 .

4. (a) Find the directional derivative of $f = \frac{y}{x^2 + y^2}$ in the direction of a vector which makes an angle of 30° with positive x -axis at point $(0, 1)$.

- (b) Prove that $\text{curl } \vec{f} = \text{grad div } \vec{f} - \nabla^2 \vec{f}$.

UNIT—II

5. (a) State Euler's theorem on homogeneous functions of two variables. Verify it for $z = xy f\left(\frac{x}{y}\right)$.

(b) Expand $e^x \sin y$ in powers of x and y as far as the terms of third degree.

6. (a) If $u^3 + v + w = x + y^2 + z^2$, $u + v^3 + w = x^2 + y + z^2$,
 $u + v + w^3 = x^2 + y^2 + z$, prove that

$$\frac{\partial(u, v, w)}{\partial(x, y, z)} = \frac{1 - 4(yz + zx + xy) + 16xyz}{2 - 3(u^2 + v^2 + w^2) + 27u^2v^2w^2}.$$

(b) Show that the functions $u = x + y + z$, $v = yz + zx + xy$,
 $w = x^3 + y^3 + z^3 - 3xyz$ are not independent of one another. Also find the relation between them.

7. (a) Find the envelope of a system of concentric and co-axial ellipses of constant area.

(b) Show that the evolute of the curve $x^{\frac{2}{3}} + y^{\frac{2}{3}} = a^{\frac{2}{3}}$ is

$$(x + y)^{\frac{2}{3}} + (x - y)^{\frac{2}{3}} = 2a^{\frac{2}{3}}.$$

8. (a) Find the maximum and minimum values of the function

$$f(x, y) = \sin x + \sin y + \cos(x + y).$$

(b) Find the maximum value of the function $f(x, y, z) = xyz$ subject to the condition $xy + yz + zx = a$, where $x, y, z > 0$.

Facing Problems in Graduation Math We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Doubt Solving:

Our Doubt Clearance Sessions, emphasizing Misconceptions and repeated errors. Along with that, we help you create study plan that will ensure your success in exam.

Foundation for IIT JAM & CSIR NET and Competitive Maths

Mathematics in Graduation is first step towards the higher and competitive Maths. We focus on conceptual understanding which work as a base for the competitive maths.

Clear B.Sc., B.Com, BCA, B.Tech College Maths with good grades

Getting good marks along with conceptual understanding will boost your confidence. Feel free to ask for Demo sessions. You have liberty to join the classes for specific topic rather than whole book.

Dr. Himanshu Singla (Ph.D Maths)

7 Years Teaching Experience at prestigious institutes like NMIMS (Chd), DAVC Sector 10, PGGC 11 Chd., UIET Sector 25

We make Maths easy for you at Abhyaskul. We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Follow our You Tube Channel. (Search Abhyaskul at You Tube)

Learn the basics of math at our YouTube channel!

Our channel covers a wide range of math topics, from basic arithmetic to algebra and geometry. You can always ask to make a video on any topic. We wil try to provide it as soon as possible.

Whether you're struggling with a particular concept or just want to brush up on your math skills, our YouTube channel is a great resource. Visit our channel today and start learning!

Career Opportunities in Maths

After graduating in maths, a world of opportunities opens up. You can pursue careers in finance, data science, engineering, research, or academia. Maths graduates are in demand for their analytical and problem-solving skills, and they can play a key role in driving innovation and solving complex challenges in a variety of industries. For any query regarding career opportunity in Math, feel free to meet.
