B.A./B.Sc. (General) 3rd Semester
(2122)
MATHEMATICS
Paper–III (Statics)

Time Allowed : Three Hours]　　　　**[Maximum Marks : 30**

Note :—Attempt **five** questions in all, selecting at least **two** questions from each Unit.

UNIT–I

1. (a) Find the magnitude and direction of the resultant of two forces acting at a point at an angle α. 　　3

   (b) If P and Q are two components of a force F and its line of action divides the angle between them in the ratio 1 : 2. Prove that $Q(F + Q) = P^2$. 　　3

2. (a) The resultant of forces P and Q acting at a point is R. If Q be doubled, R is doubled and if Q is reversed R is again doubled. Prove that $P : Q : R :: \sqrt{2} : \sqrt{3} : \sqrt{2}$. 　　3

   (b) State and prove λ–μ theorem. 　　3

3. (a) The resultant of two like parallel forces P, Q passes through the point C. When P is increased by R and Q by S, the resultant still passes through C, and also when Q, R replaces P, Q respectively show that

$$S = R - \frac{(Q-R)^2}{P-Q}.$$ 3

(b) If a number of forces acting at a point be represented in magnitude and direction by the sides, taken in order of a Closed Polygon. Prove that they are in equilibrium. 3

4. A weight W is supported on a smooth plane of inclination α to the horizontal by a force whose line of action makes an angle 2α with the horizontal. If the pressure on the plane be arithmetic mean of the weight and the force. Show that

$$\alpha = \frac{1}{2} \sin^{-1}\left(\frac{3}{4}\right).$$ 6

UNIT–II

5. (a) Explain the moment of a force about a point and give its Geometrical representation. 3

(b) Forces P, Q, R act along the sides BC, CA, AB respectively of triangle ABC. If the resultant passes through the centroid. Show that $\frac{P}{a} + \frac{Q}{b} + \frac{R}{c} = 0$. 3

6. (a) Prove that a single force and a Coplanar Couple acting on a rigid body cannot balance and are equivalent to a single force equal and parallel to the given force. 3

(b) A uniform rod AB of weight W, movable about a hinge at A, rests with the other end against a smooth vertical wall. If α be the inclination of the rod to the vertical, prove that the magnitude of the reaction at hinge A is

$$\frac{1}{2} W \sqrt{4 + \tan^2 \alpha} .$$

3

7. (a) P, Q are two like parallel forces. If two equal and opposite forces S along any two parallel lines at a distance b apart in the plane of P, Q are combined with them. Show that the resultant is displaced through a distance $\dfrac{bS}{P + Q}$.

3

(b) Explain Angle of friction and Co-efficient of friction.

3

8. (a) How high can a particle rest inside a rough hollow sphere of radius a if the coefficient of friction is μ ?

3

(b) A uniform ladder rests with one end against a smooth vertical wall and the other on the rough ground, the coefficient of friction is $\dfrac{3}{4}$. If the inclination of the ladder to the ground is 45°. Show that a man whose weight is equal to that of the ladder can just ascend to the top of the ladder without slipping. 3

Facing Problems in Graduation Math We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Doubt Solving:

Our Doubt Clearance Sessions, emphasizing Misconceptions and repeated errors. Along with that, we help you create study plan that will ensure your success in exam.

Foundation for IIT JAM & CSIR NET and Competitive Maths

Mathematics in Graduation is first step towards the higher and competitive Maths. We focus on conceptual understanding which work as a base for the competitive maths.

Clear B.Sc., B.Com, BCA, B.Tech College Maths with good grades

Getting good marks along with conceptual understanding will boost your confidence. Feel free to ask for Demo sessions. You have liberty to join the classes for specific topic rather than whole book.

Dr. Himanshu Singla (Ph.D Maths)

7 Years Teaching Experience at prestigious institutes like NMIMS (Chd), DAVC Sector 10, PGGC 11 Chd., UIET Sector 25

We make Maths easy for you at Abhyaskul. We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Follow our You Tube Channel. (Search Abhyaskul at You Tube)

Learn the basics of math at our YouTube channel!
Our channel covers a wide range of math topics, from basic arithmetic to algebra and geometry. You can always ask to make a video on any topic. We wil try to provide it as soon as possible.
Whether you're struggling with a particular concept or just want to brush up on your math skills, our YouTube channel is a great resource. Visit our channel today and start learning!

Career Opportunities in Maths

After graduating in maths, a world of opportunities opens up. You can pursue careers in finance, data science, engineering, research, or academia. Maths graduates are in demand for their analytical and problem-solving skills, and they can play a key role in driving innovation and solving complex challenges in a variety of industries. For any query regarding career opportunity in Math, feel free to meet.
