

Total No. of Questions : 8] [Total No. of Printed Pages : 7
(1126)

**B.A./B.Sc. (General) Vth Semester (0005)
Examination**

0445

**MATHEMATICS
(Probability Theory)
Paper : III**

Time : 3 Hours]

[Maximum Marks : 30

Note :- Attempt five questions in all, selecting at least two questions from each Section. All questions carry equal marks.

Section-A

1. (a) A typical PIN (Personal Identification Number) is a sequence of any *four* symbols chosen from 26 letters in the alphabet and the ten digits. If all PINs are equally likely, find the probability that a randomly chosen PIN contains a repeated symbol.

A-331

(1) .

Turn Over

- (b) State and prove Bayes' theorem.
2. (a) A bowl contains 10 balls of same size and shape out of which one of the balls is red. Balls are drawn one by one at random and without replacement until the red ball is drawn. Find the p. m. f. and c. d. f. of random variable X , the number of trials needed to draw the red chip.
- (b) Let X be a continuous random variable having p. d. f. :

$$f(x) = \begin{cases} 6x(1-x), & 0 \leq x \leq 1 \\ 0, & \text{elsewhere} \end{cases}$$

Find a number m such that $P(X < m) = P(X > m)$.

A-331

(2)

3. (a) Let a random variable X of continuous types has a probability density function $f(x)$, whose graph is symmetric with respect to $x = c$. If the mean value of X exists, then show that $E(X) = c$.

(b) Let X be a continuous random variable having p. d. f. :

$$f(x) = \begin{cases} \frac{3}{4}x(2-x), & 0 \leq x \leq 2 \\ 0, & \text{elsewhere} \end{cases}$$

Find measure of skewness and kurtosis of the distribution.

4. (a) If a fair coin is tossed at random five independent times, find the conditional probability of five heads relative to the hypothesis that there are at least four heads.

A-331

(3)

Turn Over

- (b) If for a Poisson random variable X , $E(X^2) = 20$, find $E(X)$.

Section-B

5. (a) Let X be uniformly distributed over $[-\alpha, \alpha]$, where $\alpha > 0$. Find α so that :

(i) $P(X > 1) = \frac{1}{3}$

(ii) $P\left(X < \frac{1}{2}\right) = 0.8$

(iii) $P(|X| < 1) = P(|X| > 1)$

- (b) Find coefficients of skewness and kurtosis of an exponential distribution and describe nature of the distribution.

6. (a) If X has gamma distribution with $\alpha = \frac{r}{2}$,

$r \in \mathbf{N}$ and $\beta > 0$, then show that $Y = \frac{2X}{\beta}$

is $\chi^2(r)$.

(b) There are six hundred mathematics students in the graduate classes of a university and the probability for any student to need a copy of a particular book from the university library on any day is 0.05. How many copies of the book should be kept in the university library so that the probability may be greater than 0.90 that none of the students needing a copy from the library has to come back disappointed ?

(a) Let two dimensional continuous random variable (X, Y) has joint probability density function given by :

$$f(x, y) = \begin{cases} 6x^2y, & 0 < x < 1, 0 < y < 1 \\ 0, & \text{elsewhere} \end{cases}$$

(i) Verify that $\int_0^1 \int_0^1 f(x, y) dx dy = 1$.

(ii) Find $P(0 < X < \frac{3}{4}, \frac{1}{3} < Y < 2)$.

(iii) Find $P(X + Y < 1)$.

(iv) Find $P(X > Y)$.

(v) Find $P(X < 1 \mid Y < 2)$.

(b) Let $f(x, y) = \begin{cases} 8xy, & 0 < x < y < 1 \\ 0, & \text{elsewhere} \end{cases}$.

Find :

(i) $E(Y \mid X = x)$

(ii) $E(X \mid Y = y)$

(iii) $\text{Var}(Y \mid X = x)$

(iv) $\text{Var}(X \mid Y = y)$

8. (a) Let the variables X and Y be connected by equation $aX + bY + c = 0$. Prove that the coefficient of correlation between X and Y is -1 if a and b are of same sign and $+1$ if a and b are of opposite signs.

A-331

(6)

(b) In a certain population of married couples the height X of the husband and the height Y of the wife has a bivariate normal distribution with parameters $\mu_X = 5.8$ feet, $\mu_Y = 5.3$ feet, $\sigma_X = 0.2$ feet and $r = 0.6$. If height of the husband is 6.3 feet, find the probability that his wife has a height between 5.28 and 5.92 feet.

Facing Problems in Graduation Math We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Doubt Solving:

Our Doubt Clearance Sessions, emphasizing Misconceptions and repeated errors. Along with that, we help you create study plan that will ensure your success in exam.

Foundation for IIT JAM & CSIR NET and Competitive Maths

Mathematics in Graduation is first step towards the higher and competitive Maths. We focus on conceptual understanding which work as a base for the competitive maths.

Clear B.Sc., B.Com, BCA, B.Tech College Maths with good grades

Getting good marks along with conceptual understanding will boost your confidence. Feel free to ask for Demo sessions. You have liberty to join the classes for specific topic rather than whole book.

Dr. Himanshu Singla (Ph.D Maths)

7 Years Teaching Experience at prestigious institutes like NMIMS (Chd), DAVC Sector 10, PGGC 11 Chd., UIET Sector 25

We make Maths easy for you at Abhyaskul. We are here to guide you.

We are here to help you. Mathematics as a subject in graduation is a challenging task for many students. We focus on basics and art of problem solving rather than just learning the solution part.

Follow our You Tube Channel. (Search Abhyaskul at You Tube)

Learn the basics of math at our YouTube channel!

Our channel covers a wide range of math topics, from basic arithmetic to algebra and geometry. You can always ask to make a video on any topic. We wil try to provide it as soon as possible.

Whether you're struggling with a particular concept or just want to brush up on your math skills, our YouTube channel is a great resource. Visit our channel today and start learning!

Career Opportunities in Maths

After graduating in maths, a world of opportunities opens up. You can pursue careers in finance, data science, engineering, research, or academia. Maths graduates are in demand for their analytical and problem-solving skills, and they can play a key role in driving innovation and solving complex challenges in a variety of industries. For any query regarding career opportunity in Math, feel free to meet.
